DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-7, 10-11, 13-19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Douglass et al.

Douglass discloses the invention including a pivot frame 42, a pivot assembly 46, a blade assembly 1, first biasing means 48 and second biasing means (the pin that connect the member 46 with the member 42).

3. Claims 1-3, 5-8, 10-21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Lund.

Lund discloses the invention including a pivot frame 1, a pivot assembly 2, a blade assembly 3, first biasing means 8 and second biasing means/cantilever spring 6.

4. Claims 1-3, 5-7, 9-12, 13-20 and 22-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Apprille, Jr (4,756,082).

Apprille discloses the invention including a pivot frame 12, a pivot assembly (14 and 16), a blade assembly 10, first biasing means (52 and 54) and second biasing means/cam follower 64.

Response to Arguments

5. Applicant's arguments have been fully considered but they are not persuasive. There is no difference between the biasing member and the connecting member in the claims. Also, the biasing means does not mean that it is resilient, which is missing from the prior art (Douglass et al.).

Conclusion

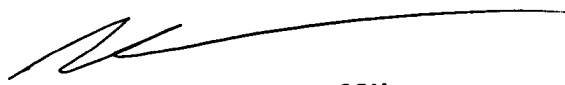

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Trippe, Borden, Hawes et al., King et al. and Oldroyd are cited to show related device.
